

4 Head Sizes

To adapt to your hands and best accesibility versus cutting capacity.

The Right Tool For The Right Job!

Precision Cutting & Shear Cutting: Edge Bevel / Cut Result

Handle Options

Product Selection Guide

Below part numbers come on monomaterial handles, for bimaterial handle add RX before the part number:
Example 8130 – RX8130

PART NUMBER	SIZE	SHAPE	CUT RESULT OR SURFACE	38	32	28	26	24	22	21	20	19	18	17	16.5	16	15	14.5	14	13.5	13	12.5	12	Gauge

8130	Extra Small	Oval	Micro-Bevel®																					
8131	Extra Small	Oval	Flush																					
8132	Extra Small	Oval	Ultra-Flush®																					
8133	Extra Small	Tapered	Micro-Bevel®																					
8136	Extra Small	Tapered & Relieved	Micro-Bevel®																					
8137	Extra Small	Tapered & Relieved	Flush																					
8138	Extra Small	Tapered & Relieved	Ultra-Flush®																					
8140	Small	Oval	Micro-Bevel®																					
8141	Small	Oval	Flush																					
8142	Small	Oval	Ultra-Flush®																					
8143	Small	Tapered	Micro-Bevel®																					
8144	Small	Tapered	Flush																					
8145	Small	Tapered	Ultra-Flush®																					
8146	Small	Tapered & Relieved	Micro-Bevel®																					
8147	Small	Tapered & Relieved	Flush																					
8148	Small	Tapered & Relieved	Ultra-Flush®																					
8149	Small	Tip	Flush																					
8150	Medium	Oval	Micro-Bevel®																					
8151	Medium	Oval	Flush																					
8152	Medium	Oval	Ultra-Flush®																					
8153	Medium	Tapered	Micro-Bevel®																					
8154	Medium	Tapered	Flush																					
8155	Medium	Tapered	Ultra-Flush®																					
8156	Medium	Tapered & Relieved	Micro-Bevel®																					
8157	Medium	Tapered & Relieved	Flush																					
8158	Medium	Tapered & Relieved	Ultra-Flush®																					
8160	Large	Oval	Micro-Bevel®																					
8161	Large	Oval	Flush																					
8162	Large	Oval	Ultra-Flush®																					
8163	Large	Tapered	Micro-Bevel®																					
8164	Large	Tapered	Flush																					
8165	Large	Tapered	Ultra-Flush®																					
8166	Large	Tapered & Relieved	Micro-Bevel®																					
8167	Large	Tapered & Relieved	Flush																					
8168	Large	Tapered & Relieved	Ultra-Flush®																					
8211	Small	Angle 20°	Flush																					
8233A	Extra Small	Micro Tip 10°	Flush																					
8234A	Extra Small	Micro Tip 10°	Flush																					
8237A	Extra Small	Micro Tip 50°	Flush																					
8247	Small	Angle 45°	Flush																					
8248	Small	Angle 45°	Flush																					
8249	Small	Angle 45°	Flush																					
7990	Extra Small	Tapered	Micro-Bevel®																					
7991	Extra Small	Tapered	Flush																					
7280	Small	Angle	Flush																					
7290	Small	Angle	Micro-Bevel®																					
7291	Small	Angle	Flush																					
7292	Small	Transverse End	Flush																					
7293	Small	Angle	Flush																					
7154TC	Medium	Tapered	Flush																					
8140M2	Small	Oval	Micro-Bevel®																					
8150M2	Medium	Oval	Micro-Bevel®																					
8160M2	Large	Oval	Micro-Bevel®																					
8154PSP	Medium	Tapered	Flush																					
6151	Medium	Tapered	Micro EDGE																					
6152	Medium	Tapered	Flush EDGE																					
6152SS	Medium	Tapered	Flush EDGE																					
6159	Medium	Pointy	Flush EDGE																					
6258	Medium	Angle	Flush EDGE																					
7390	Small	Flat Nose Stubby	Smooth Tip																					
7392	Small	Oblique, Stubby	Smooth Tip																					
7490	Small	Flat Nose	Smooth Tip																					
7590	Small	Round Nose	Smooth Tip																					
7890	Medium	Chain Nose	Smooth Tip																					
7891	Medium	Chain Nose	Serrated Tip																					
7892	Medium	Bent Nose	Smooth Tip																					
7893	Small	Snipe Nose	Smooth Tip																					
7894	Large	Needle Nose	Smooth Tip																					

Piano wire
Tensile strength of wire 2400 MPa

Hard wire: Stainless Steel, Titanium and Platinum
Tensile strength of wire 1800 MPa

Medium Hard wire: Standard Steel, Gold and Sterling Silver
Tensile strength of wire 800 MPa

Soft wire: Copper Wire, Soft Plastics
Tensile strength of wire 250 MPa

Lead Catcher:
813 for 8130-8132 and RX 8130-8132
814 for 8140-8148 and RX 8140-8148

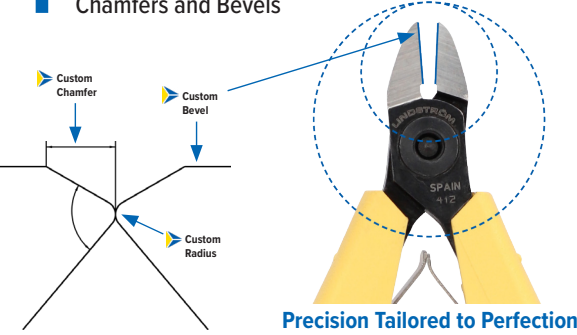

CUTTERS

PLIERS

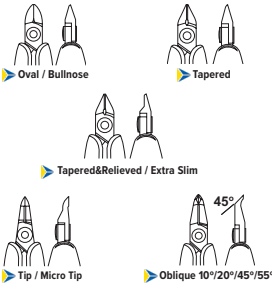

Performance Specific Program

This groundbreaking initiative offers tailored solutions for your unique cutting requirements, featuring customizable cutting edges and head shapes designed to meet the highest standards of accuracy and performance. From custom radius, chamfers, and bevels to specialized head geometries, Lindström Tools is your partner in precision innovation.

1 Custom Radius and Chamfers and Bevels

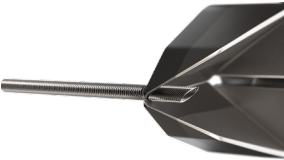

2 Specialized Head Shapes

Carbide Cutters

The Lindstrom 7154TC Precision Tungsten Carbide Cutter is specifically developed for use on hard wire applications that have minimal inside diameter access. The precision cutting head design allows for consistent, precise flush “tip cuts” on catheters and trimming stents. An excellent choice for cutting guidewires as well.

▶ Trimming a 0.4mm. / 0.010” diameter Stainless Steel Catheter

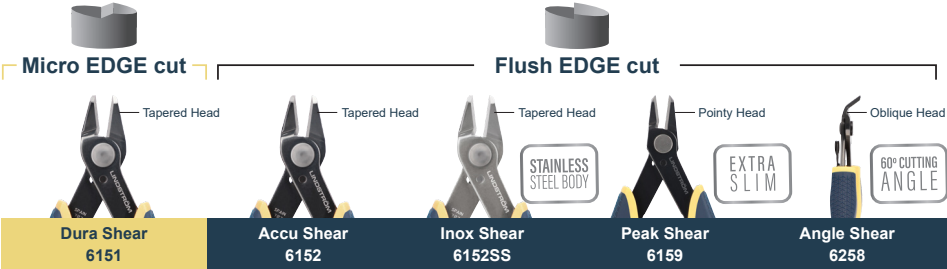

▶ Finished Flush tip cut on a 0.1 mm / 0.004” inside diameter Stainless Steel Catheter

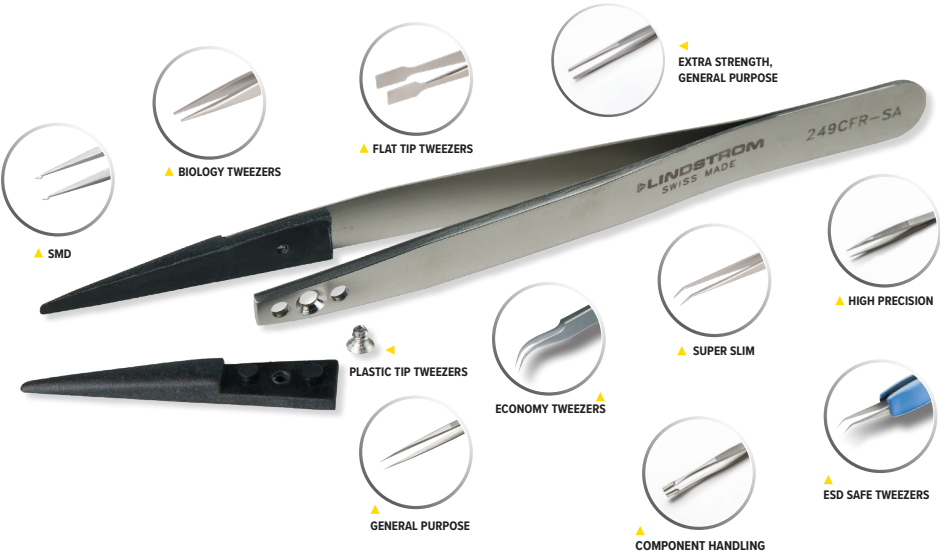

EDGE Shear Cutters

The EDGE assortment includes five shear cutters that combine durability, performance, precision and comfort, each designed with its own personality to suit specific cutting needs.

Tweezers Styles For Every Application
